Career Objective

Passionate and detail-oriented Web Developer with hands-on experience in building responsive and feature-rich web applications using the MERN stack. Proficient in both frontend and backend development, with a strong foundation in RESTful APIs, database design, and role-based systems. Eager to contribute to a dynamic team and build impactful, user-friendly digital solutions.

Technical Skills

Languages & Tools: JavaScript, HTML5, CSS3, Git, GitHub, Docker

Frontend: React, Next.js

Backend: Node.js, Express.js

Database: MongoDB, Mongoose, MySQL

Others: REST APIs, Authentication, Role-based Access Control

Projects

- Task Manager Web App (MERN Stack)

GitHub: <https://github.com/Ravinder125/TaskManager>

Live : <https://task-manager-njjo.vercel.app/>

A full-featured task management system with two user roles: Admin and User.

- Admin can create, update, delete, assign tasks, manage team members, and generate invite codes.
- Users can view and update task status (e.g., todo checklist).
- Both Admin and User can update their profile (name, email, password, profile picture).

Built with clean architecture, proper authentication, role-based access, and reusable components.
